our clients' challenges to achieve
extraordinary outcomes

A SPECIALIST PROFESSIONAL SERVICES CONSULTANCY

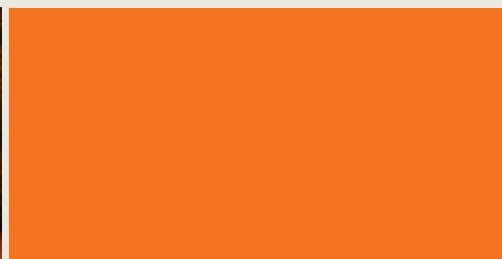

Coffey International Limited is a specialist professional services consultancy with expertise in geosciences, international development, and project management. Operating for more than 50 years, we are well known in our markets for deep technical skills and market-leading solutions to complex tasks. Coffey is listed on the Australian Securities Exchange (ASX: COF).

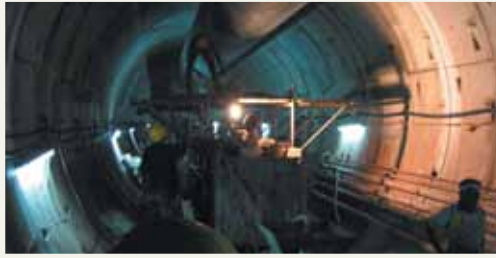

Coffey's geosciences consultancy has worked on some of the world's most challenging projects. Our specialist technical knowledge and market-leading innovations have established Coffey as a leader in geotechnical, environmental and mining engineering, as well as materials testing and analysis. Our engineering and strategic advisory services support clients in mining, oil and gas, infrastructure, construction, property and government.

Our international development business is one of the most trusted and experienced around the world, working alongside governments and donor agencies to strengthen governance, promote economic growth and create conditions for sustainable development. We apply our expertise and local knowledge to build capacity, ultimately delivering programs to improve a range of social indicators. Our team has strong affiliations with key donor agencies and governments.

Our project management business manages delivery of complex property and infrastructure projects. We work in partnership with clients through the project lifecycle, providing counsel and support with project management and advisory services. We pride ourselves on our reliability, responsiveness and understanding of our clients' businesses.

At Coffey, our people are dedicated to sharing our clients' challenges - providing value by pushing the boundaries of technical excellence to achieve extraordinary outcomes.

Coffey Geotechnics is a specialist ground engineering business and is renowned for solving complex technical challenges, pioneering new solutions and sharing knowledge on a diverse range of ground conditions to provide a customised solution for each project.

We have some of the world's best thought-leaders working across the mining, energy, infrastructure, property and government sectors. We pride ourselves on creating client value by reducing risks and providing exceptional quality work.

Our services encompass site investigation, geotechnical interpretation, analysis, and design and construction advice.

GATEWAY UPGRADE PROJECT

Client: **Leighton-Abigroup**
Location: **Brisbane, Australia**

Coffey Geotechnics was part of the consortium for this award-winning project which was awarded the Project of the Year 2011 by Infrastructure Partnerships Australia. Our services provided include complex site investigation, monitoring, full geotechnical design and construction services such as bridge foundation design, fill embankment design, ground treatments, pavements and construction advice. Specialist Coffey staff were involved from around Australia, NZ and the UK with Coffey Environments and Coffey Projects also involved in the upgrade.

TORONTO-YORK SPADINA SUBWAY EXTENSION

Client: **Toronto Transit Commission**
Location: **Toronto, Canada**

C\$2.6 billion, the 8.6-kilometre subway extension will have six stations and will wind through the City of Toronto and the York University's Keele campus into the City of Vaughan. The project involves infrastructure upgrades throughout the Greater Toronto Area as well as four new Light Rail Transit lines to areas currently not served by rapid public transit. Coffey Geotechnics is providing geotechnical, geoenvironmental and hydrogeological consulting services.

Achieving extraordinary outcomes throughout the project lifecycle requires specialist knowledge which transforms environmental, social and safety expenditure into investment.

Coffey Environments provides technical and advisory services covering environmental, social and health and safety issues, waste management and energy monitoring services through a project lifecycle – from conception through planning, design, approvals, financing, construction, operations, monitoring and compliance, closure, decommissioning and site rehabilitation.

We are technical experts in our field and regularly present, participate and promote discussion at industry forums, standards development groups, review panels and technical advisory bodies.

WYNYARD QUARTER REDEVELOPMENT

Client: **Waterfront Auckland on behalf of the Auckland Council**
Location: **Auckland, New Zealand**

Coffey Environments is providing specialist contaminated land consulting for one of the largest waterfront urban renewal developments ever undertaken in New Zealand. Our work includes site assessment, contamination classification, consent approval, remediation cost estimates, contract management, remediation liabilities negotiation, remediation, feasibility studies and action plans, design, construction and operation of remediation systems.

HIGHLANDS LIQUEFIED NATURAL GAS PROJECT

Client: **Esso**
Location: **Papua New Guinea**

Coffey Environments has been working on this project since the initial studies commenced in 2004, developing a comprehensive social impact assessment and conducting the largest archaeological salvage program in the southern hemisphere. Financing arrangements were completed just over a year ago and the project is now in the early stage of a four-year construction period.

Coffey Information is a materials testing and analysis business.

We are an industry leading specialist providing independent verification, conformity and technical assessment of construction work and construction materials to the infrastructure, government, resources, property development and material extraction and supply industries.

Our NATA accredited testing facilities and LEAN designed testing labs offer optimum efficiency, which can also be setup as site-specific testing facilities in remote locations.

GORGON GAS PROJECT

Client: **Thiess**

Location: **Barrow Island, Western Australia**

Coffey Information is providing laboratory and field testing services including aggregate, rock, soil, density testing for Thiess along with onsite concrete testing for Ertech.

Coffey Geotechnics and Coffey Environments also provide services on Barrow Island gas projects.

HUME HIGHWAY

Client: **Abigroup**

Location: **New South Wales, Australia**

Coffey Information has provided laboratory and field testing services including construction materials conformance, technical assessments and quality control testing for many Hume Highway upgrades.

Coffey Information is currently working on the Holbrook Bypass providing laboratory and field testing services including construction materials conformance and quality control testing for the construction phase of the project.

At Coffey Mining, we understand our clients' challenges and deliver practical, innovative and cost-effective solutions across all commodities.

Our team is professionally accredited in all major mining jurisdictions globally and with operations based in Australia, the Americas, and Africa.

We provide specialist mining consulting services, independent reports, technical audits and studies, and operational support and optimisation services to the global resource sector.

Our clients range from junior mining explorers, and mid-cap mining firms, to investment funds, blue chip firms, stock exchanges, and resource funds.

SOLOMON IRON ORE PROJECT

Client: **Fortescue Metals Group**

Location: **Pilbara Region, Western Australia**

Coffey Mining was commissioned by Fortescue to undertake mine engineering studies comprising pit optimisation, mine design, mine site infrastructure, tails evaluation and storage strategies and mine production scheduling.

The services provided by Coffey Mining resulted in the project receiving corporate approval for construction and a maiden reserve statement.

OLLACHEA GOLD PROJECT

Client: **Minera Kurri Kullu S.A, Minera IRL SA**

Location: **Peru, South America**

Coffey Mining prepared a scoping study for the development of the Ollachea Gold Project which involved the fields of resources estimation, geotechnical, mining, metallurgy, tailings, disposal facilities assessment, preliminary layouts and conceptual capital and operating cost estimates. Coffey Mining continues to be involved in the resources, underground geotechnical and mining aspects of the work.

The services provided by Coffey Mining helped the client to obtain their listing on the Toronto Stock Exchange.

With four decades of experience and more than 1,600 development professionals, Coffey International Development is one of the world's most experienced and trusted international development consulting companies.

We provide services to a wide range of clients including AusAID, DFID, USAID, the Islamic Development Bank, the European Commission, the Asian Development Bank, the World Bank and the UN.

We also work directly with domestic and foreign governmental ministries, departments and units as well as a number of foundations, universities, non-government organisations and private corporations.

Coffey International Development applies specialist knowledge and experience to solve some of the toughest development challenges facing communities worldwide.

GROWTH, EMPLOYMENT AND MARKETS IN STATES (GEMS)

Client: **DFID and World Bank**

Location: **Nigeria**

Coffey International Development is managing the construction sector component of this major market development program in Nigeria. The project is working to strengthen the performance of the construction sector to generate 20,000 employment and income opportunities. Initially focusing on Lagos State, the project is being rolled out to Abuja, Kaduna and Kano.

NIAS RECONSTRUCTION PROGRAM

Client: **AusAID**

Location: **Nias, Indonesia**

A recipient of a 2010 Consult Australia Gold Award, this program was a response to Indonesia's request for assistance with the reconstruction in Nias following a major earthquake in March 2005. The program had a long-term goal of contributing to the development of the area through three components: small-scale community infrastructure, community engagement strengthening and governance infrastructure. Over 100 villages were assisted, and nine local government offices constructed. Local communities were trained in building methods, use of machinery and aspects of construction and contract management to provide them with the skills and confidence they needed to handle the reconstruction work themselves.

Coffey Projects is a leading project management company providing independent and professional advice at every stage of the project, from concept to completion.

We work in partnership with clients through the project lifecycle; providing counsel and support by way of project management and advisory services, including business case development, project scope definition, consultant contractor procurement, design management, contract administration, program management, value management and strategic risk management.

We have delivered iconic and award-winning commercial, retail, residential, tourism and hospitality, sport and leisure, industrial, urban redevelopment, health, education, justice and transportation infrastructure projects in many locations, from major cities to regional communities.

Our people understand the local issues and pride ourselves on our reliability, responsiveness and understanding of our clients' businesses.

CHRISTCHURCH INTERNATIONAL AIRPORT UPGRADE

Client: **Christchurch International Airport**

Location: **Christchurch, New Zealand**

Coffey Projects has been managing upgrades on the airport since 1995 including the award-winning control tower, a retail expansion and the recently completed domestic and international upgrade. The most recent upgrade included a new baggage handling facility, check-in hall and a staged remodelling of arrival and departure areas.

AUSTRALIAN HEARING HUB

Client: **Macquarie University**

Location: **Sydney, Australia**

The Australian Hearing Hub will be a unique, world-class facility purpose designed to accommodate collaboration in research, research training, teaching and learning in hearing and hearing-related speech and language disorders. Project managed by Coffey Projects, this facility has been designed to achieve a 5 Star Green Star Design and As-Built Rating.

The facility will bring together key university research groups in hearing and cognitive sciences, neurosurgery, and special education with major hearing disorder-related government and private sector organisations involved in the development of hearing technologies.

Transportation infrastructure is essential to enable the development and growth of communities.

Coffey Rail is a specialist engineering consultancy delivering innovative and smarter solutions that connect communities. We provide leading strategic, modelling, design, management and implementation services to clients in the rail industry.

Our services include condition assessment of existing infrastructure, level crossing upgrade design, rail operations simulation, system integration management, testing and commissioning, and project delivery management.

REGIONAL RAIL LINK PROJECT

Client: **Department of Transport**

Location: **Victoria, Australia**

Coffey Rail is a lead technical consultant for the \$4 billion Regional Rail Link Project. Responsibilities include providing technical leadership to the signalling and communications system design.

Coffey Rail is also working closely with the Regional Rail Link Authority providing design management services to various parts of the program.

LEVEL CROSSING UPGRADE

Client: **Department of Transport**

Location: **Victoria, Australia**

The Victorian State Government has an ongoing program to upgrade safety at level crossings across Victoria.

Coffey Rail has conducted risk, environmental and heritage assessments; conducted feature surveys; developed civil and signalling designs; and facilitated stakeholder consultations.
